(54) WOVEN OR KNIT FABRIC HAVING MULTILAYER STRUCTURE

(57)Abstract:

PURPOSE: To obtain a woven or knit fabric having excellent compression characteristics, light weight, high bulkiness and high form stability against external force applied to the fabric after weaving or knitting.

CONSTITUTION: The objective bulky woven or knit fabric having a thickness of 15mm is produced e.g. by a double Ruschel knitting machine and composed of top and back base fabrics and yarns connecting the base fabrics. The diameter of single filament of the synthetic fiber constituting the connecting yarn is 150 μ m.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]
